

This document presents, in alphabetical order, a list of references retained during a research conducted on the concepts of 'traceability', 'reproducibility', 'verifiability' (and others). Only references related to the concept of 'traceability', at the heart of the publication, are listed below. The numbers in brackets - [] - correspond to the identification of the references used during this research process. All working documents use this numbering as a reference system. Since the research did not focus solely on the concept of traceability, numbers in brackets are not continuous.
